## Wall-mounted solar panels must be lower than the container

Can solar panels be mounted on a shipping container?

Mounting solar panels on a shipping container can be a practical solution for mobile or remote power needs. Below are the general steps and considerations for mounting solar panels on a shipping container, specifically for the models LZY-MS1 and LZY-MS3:

Can solar panels be mounted on a wall?

Roof-mounted solar panels are usually tilted at a 20-50 degree angle, which allows them to capture sunlight when the sun is high in the sky. But most wall-mounted panels are parallel to the wall, or only slightly tilted. It's also harder to fit as many solar panels on a wall as you would on a roof.

How do you mount solar panels to a container?

For side-mount type panels, attach brackets to the container walls by bolting and mount the panels onto these brackets. All glaringly obvious, those panels should now be skewed for maximum sun exposure. Connect the solar panels to the inverter and the electrical cabinet according to the manufacturer's instructions.

Do I need planning permission to install wall-mounted solar panels?

You won't typically need planning permission to install wall-mounted solar panels on a property that you own. Properties that do require planning permission are listed buildings or buildings in conservation areas, where there are restrictions on the number of changes you can make to the outside of the property.
