
What to do after solar panels are installed

What should I do after installing solar panels?

However, you still need to do some things after solar panel installation to make the most of your investment. These include: After installing solar panels, you must register your system with the Australian Small-scale Renewable Energy Scheme (SRES) administrator, the Clean Energy Regulator (CER).

What should I do if a solar panel installation damages my investment?

You don't want to find yourself without adequate protection if an unexpected event damages your new investment. Here are three crucial points to consider: Policy Adjustments: Contact your insurer immediately after your solar panel installation. Discuss the changes made to your property and ensure they update your policy accordingly.

How do I maintain my solar panels?

Maintain your solar panels by keeping them clean, free from dust and debris, and ensuring they are not shaded by tree branches. Regular cleaning and following manufacturer's instructions for maintenance are important.

How do I know if my solar system is working?

Check solar panel performance: On a sunny day, be eagle-eyed and inspect the system's performance. Look out for any underperforming panels - they'll stick out like a sore thumb in an otherwise efficient system. Check your roof for damages: Don't forget about the roof either - it's not all about the shiny new panels!
